

Individual websites, success websites, and landing pages that give visitors that holiday feeling

Your website is your hotel's **digital calling card**, its "digital face". And that's not all: Especially in the hotel industry, a website is an important tool when **competing for guests and revenues**. It's decisive for your success; after all, it's home to the booking process for direct bookings and other revenue drivers such as attractive offers and additional services. Hotel websites made by Brandnamic are easy to find thanks to **SEO**, offer a **positive user experience**, and effectively guide visitors to enquire or book.

These and many other hotels already have a website made by Brandnamic:

"When the finished website was presented to me, I couldn't hide my excitement. When what you see is exactly what you'd hoped for, you're overcome with joy."

Pietro Cerullo,
C&C

The top 5 advantages:

- + Sophisticated concept and design according to the **"user first"** principle
- + **Easy-to-operate, flexible CMS** optimised for top user-friendliness
- + **Interface integration** with all commonly used PMS software
- + **Sales-promoting design** thanks to optimal call-to-actions
- + **Top technical standard:** first-rate page-speed scores, smooth-running website for maximum availability, and sophisticated search engine optimisation (SEO)
